DIVISION OF
OIL GAS & MINING

We have reason to believe that Bill Hamm of Idaho Quartzite Corp., who I previously referred to in my letter of 6/15/93 to you, is now operating in the Starlight or Star Stone quarry leased by Keith MacKay of State Stone Co. It also appears that Bill Hamm operates at the Pickett Quarry near the junction school and possibly on properties owned by the Nelson family, ranchers in the Lynn, Utah area. All of these locations were identified in my previous letters.

The Star Stone quarry is of particular importance because of the magnitude of the disturbance, damage to the surrounding area, complete junk heap operation and some very dangerous quarry practices. I don't believe there has ever been a mining plan, I don't think the workers are legal and I seriously doubt if workman's compensation insurance is carried or payroll taxes paid on 6 men working there.

I have previously indicated that Bill Hamm could be reached in Oakley. It now appears that when he is not at the quarries he can be reached in Nampa. Please advise if you need help and let me know what action is being taken since this is a most urgent situation.

Sincerely,

Gary Mullard

Gary Mullard

P.S. The first truck load of stone from the Star Stone quarry came through Oakley this afternoon.
